The Campaign Dictionary of Military Terms provides clear definitions of over 6,000 British, American and international military vocabulary.

The dictionary aims to provide a basic vocabulary of British and American terms relating to the three services and covers subjects such as rank, organisation, training, operations in the field, logistics, radio communications, and some of the more common weapons and equipment currently in use.

New terms used by the media in reporting on recent conflicts are also included, making this an ideal source for anyone involved in teaching English to the military or armed police forces.
